PEAK

Start out on top.

Super-charged boilerplate kit for developers who love Tailwind + Alpine

Hey 👋

I'm Daniel Wentsch, Freelance Developer & Designer.

I care about Accessibility, Typography, Sustainability and Joy of Use.

Started Photoshop 5 & selfHTML

I'm Daniel 👋 a freelance designer and developer from Freiburg, Germany.

Statamic since early 2021

👨‍💻 I'm an UX/UI-Designer and Front-of-the-Frontend Developer

🛠 My favorite tools include Tailwind CSS, Statamic CMS, Alpine JS and Figma

🌍 I care a lot about accessibility, typography and sustainability

⚔ I enjoy working at the intersection of design and code

❤️ I'm happily married and father of two wonderful kids, born 2017 and 2019

🌱 I'd like to live entirely vegan but am still failing at cheese

🦶 I like running barefoot

🏕 I love being outdoors and vacation usually means camping

🤓 I'm spending too much time sorting notes and switching tools and systems for PKM

# Building sites with with Statamic since Jan 2021

Daniel Wentsch @klickreflex@freiburg.social
@klickreflex

Working with @statamic is so much fun it severely lowers my tolerance for dealing with the competition.
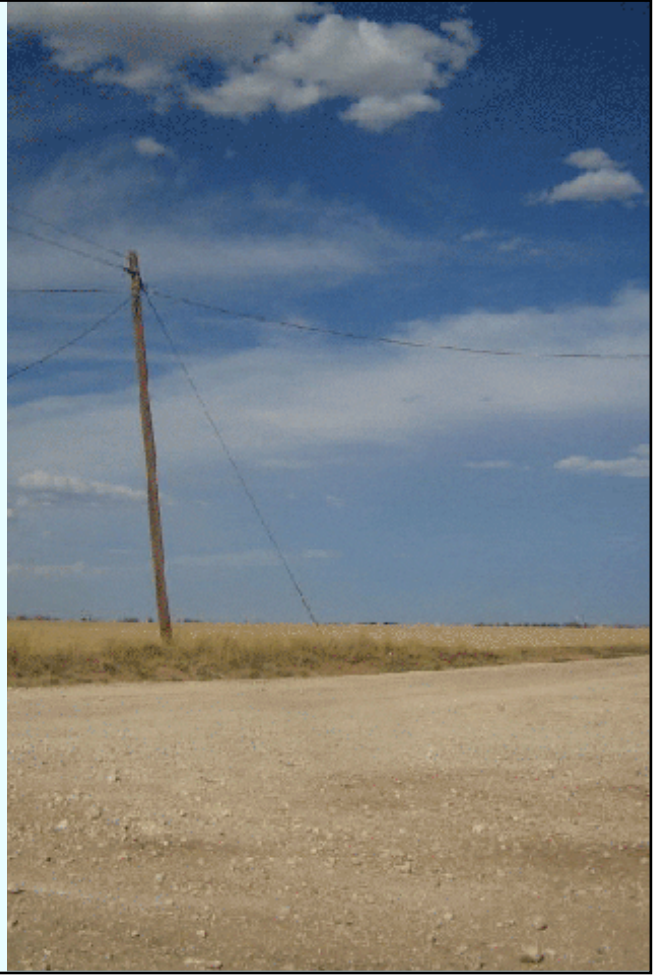

9:04 AM · Jan 30, 2021 · Twitter Web App

before many others

- typo3/Neos waaaa hellish

First Statamic Site without Peak

Pop out | Responsive | Save & Publish | ✕

statamic

...ome to your new brand Statamic site!

...e where to do next? Here are a few ideas, but feel free to ...in your own way, in your own time.

...mp into the Control Panel and edit this page or begin setting ...your own collections and blueprints.

...d to the docs and learn how Statamic works.

...tch some Statamic videos on YouTube.

...n our Discord chat and meet thousands of other ...tamic developers.

...rt a discussion and get answers to your questions.

...r Statamic on Github if you enjoy using it!

Nothing wrong, but it feels a bit *empty* ...

Peak *immediately* clicked

Daniel Wentsch @klickreflex@freiburg.social
@klickreflex

Hi Rob 👋 Just a quick thanks for releasing Peak to the public. It's one of those rare times when you find something immediately clicking and making a ton of sense. I can learn a lot to structure my projects better and that is worth a lot ❤️

10:22 AM · Mar 28, 2021 · Twitter Web App

- Robs opinions were pretty close to mine, this felt awesome

- But he's already put way more thought into practice

Intro

What's a Starter Kit Anyway?

*«Starter Kits are pre-built site packages that **jump-start new Statamic sites** with boilerplate code, **features, functionality,** and even **design**.»*

1. Build Site

2. Create starter_kit.yaml

3. Export

4. Publish (optional)

5. Install

```yaml
export_paths:
  - .env.example
  - .gitignore
  - app/Actions/GenerateSocialImages.php
  - app/Console/Kernel.php
  - app/Console/Commands
  - app/Http/Controllers/DynamicToken.php
  - app/Http/Middleware/VerifyCsrfToken.php
  - app/Jobs/GenerateSocialImagesJob.php
  - app/Listeners/GenerateFavicons.php
  - app/Providers/AppServiceProvider.php
  - app/Providers/EventServiceProvider.php
  - app/Widgets/ImagesMissingAlt.php
  - CHANGELOG.md
  - content
  - config/filesystems.php
  - config/statamic/assets.php
  - config/statamic/antlers.php
  - config/statamic/cp.php
  - config/statamic/editions.php
  - config/statamic/git.php
  - config/statamic/live_preview.php
  - config/statamic/search.php
  - config/statamic/stache.php
  - config/statamic/static_caching.php
```

- Works best/only with *new* sites

- Can be installed into an existing (blank) site or directly when installing Statamic with the CLI

  Creation Process is:

- We've got a lot to cover

- Table of Content

- Broad overview, ask at the end
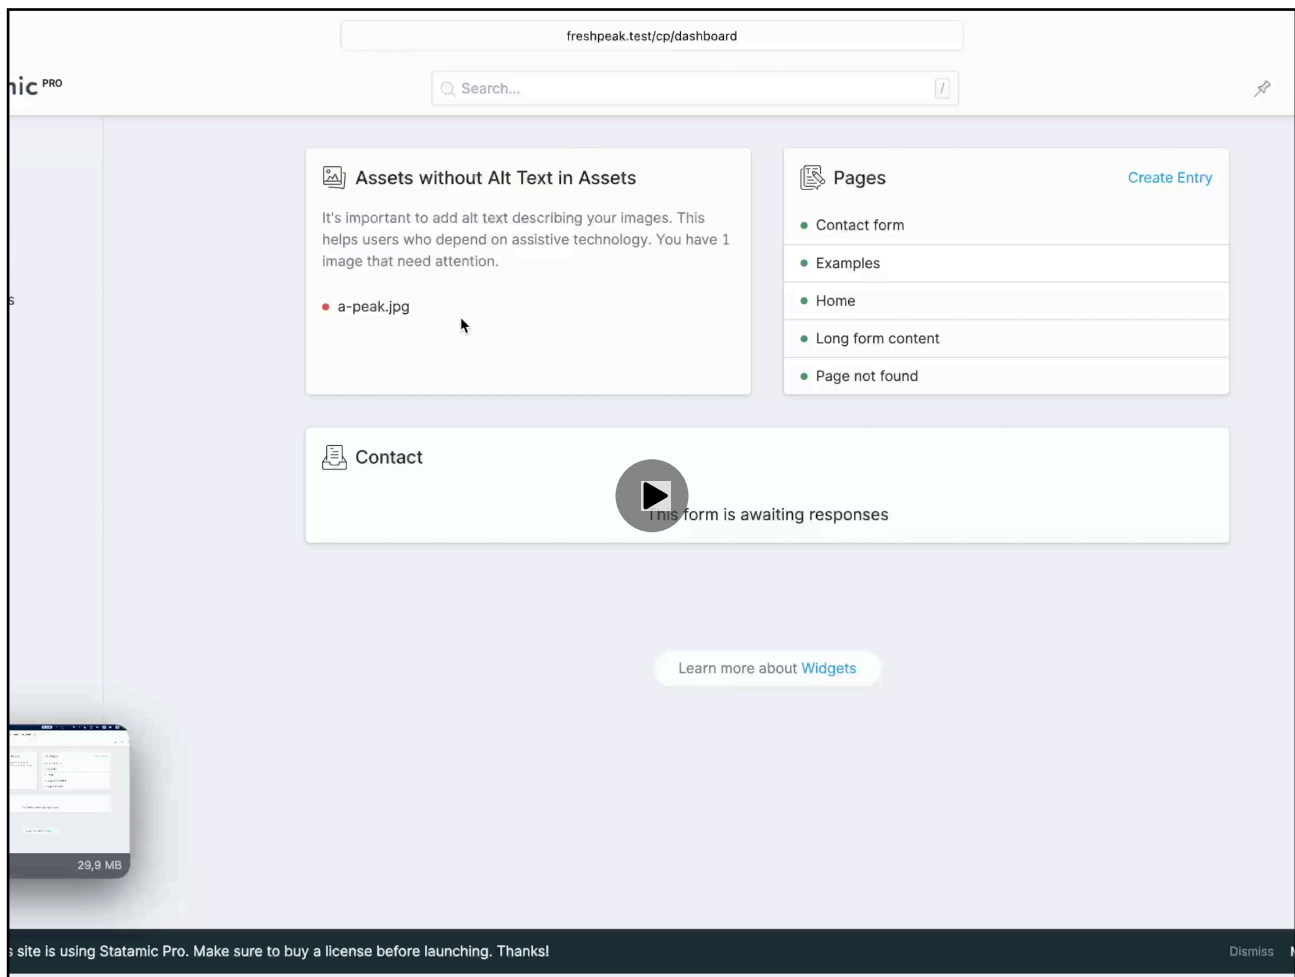

1902.studio

Rob the Kort

- Who Created Peak?
- Rob de Kort
- Free of charge (donations welcome)
- super friendly and helpful

Installing Peak
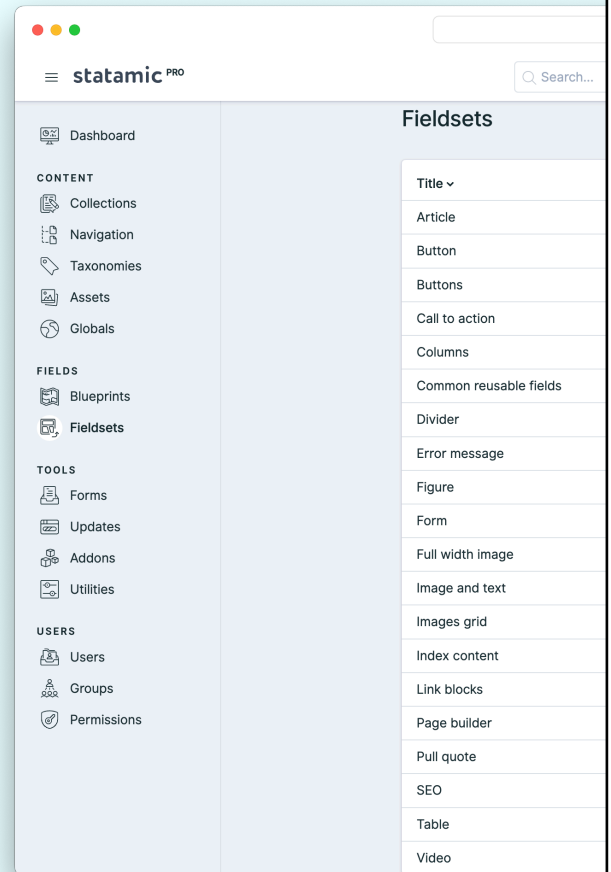

Peak is curious and wants to know a bunch of things

- building a good `.env`

- creating a good `.gitignore`

- install the chosen page builder blocks

Install prefab blocks

- Use the Page Builder Block to Select or Create entries within the FAQ Collection

- News and Events presets work similarly, but instead of a Page Builder block offer index and detail views

Add Collection

```
                                        daniel@klickbook:~/www/freshpeak
freshpeak on ⑂ main via ● v16.15.0 via 🐘 v8.1.13
→ php please peak:add-collection

What should be the name for this collection?:
> Projects

Should this be a public collection with a route? (yes/no) [yes]:
>

Do you want to mount this collection on an entry? (yes/no) [yes]:
>

Do you want to create a new page to mount this collection on? (yes/no) [
> yes

What should be the page title for this mount?:
> Projects

What should be the route for this collection? [/{mount}/{slug}]:
>

What should be the layout file for this collection? [layout]:
>

Should revisions be enabled? (yes/no) [no]:
>

Should the sort direction be ascending? (yes/no) [yes]:
>

Should this be a dated collection? (yes/no) [no]:
>

Generate and apply index template? (yes/no) [yes]:
>

Generate and apply show template? (yes/no) [yes]:
>

Grant edit permissions to editor role? (yes/no) [yes]:
>

Collection 'Projects' created.

size-xl

tailwind.config.site.js

Individual site style

☝️ Colors / type are not extended by default

- Move colors and font settings to extend if Tailwind Defaults

- colors.primary and colors.neutral is the only deviation from default tailwind

- Used across many partials, should be set or search/replaced

npm Depen- dencies

```json
"dependencies": {
  "@alpinejs/collapse": "^3.10.5",
  "@alpinejs/focus": "^3.10.5",
  "@alpinejs/persist": "^3.10.5",
  "alpinejs": "^3.10.5",
  "focus-visible": "^5.2.0"
},
"devDependencies": {
  "@tailwindcss/aspect-ratio": "^0.4.2",
  "@tailwindcss/forms": "^0.5.3",
  "@tailwindcss/typography": "^0.5.8",
  "autoprefixer": "10.4.13",
  "glob-all": "^3.3.1",
  "laravel-vite-plugin": "^0.7.1",
  "postcss": "^8.4.19",
  "postcss-focus-visible": "^7.1.0",
  "postcss-import": "^15.0.0",
  "resolve-url-loader": "^5.0.0",
  "tailwindcss": "^3.2.4",
  "vite": "^3.2.4"
}
```

Vite 🚀

`npm run dev`

`npm run build`
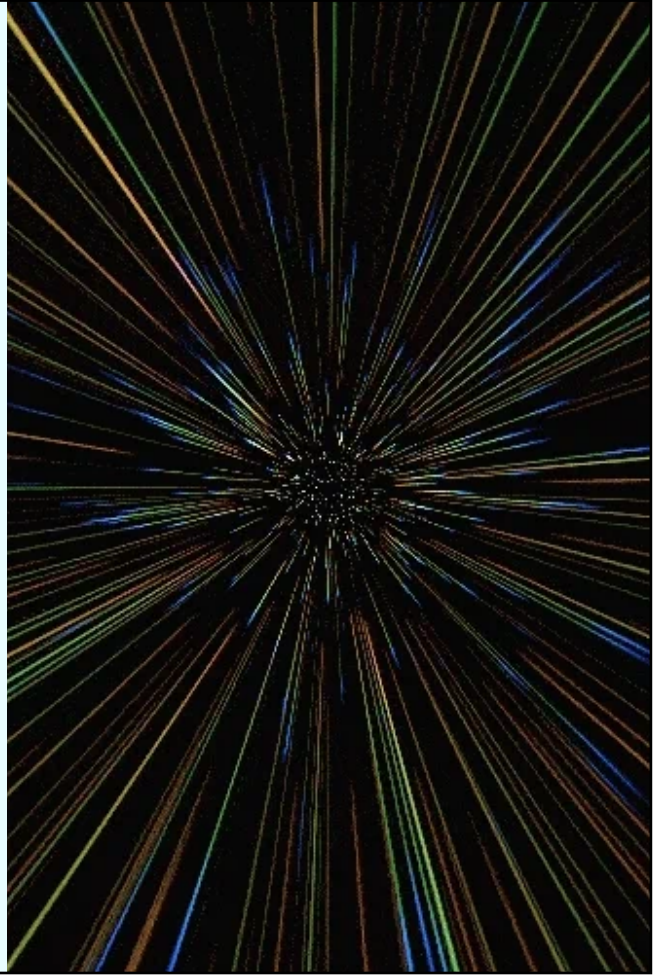

I thought I was happy with Webpack / Mix. Until I tried Vite.
Especially when designing with code, fast instant feedback can't be overemphasized
